

“French Touch in
the Nutrition”

AGRI FOOD PRODUCTS
FRACON

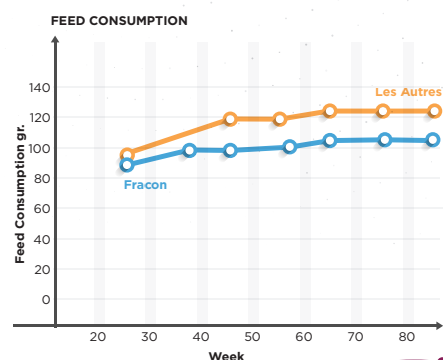

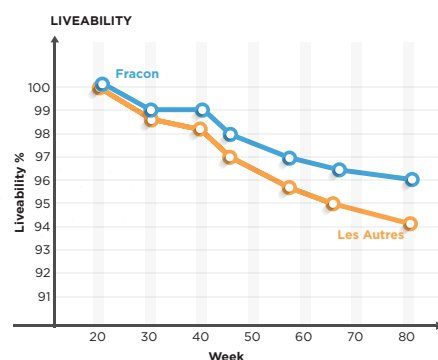

LAYER | PONDEUSE

All in one

All the Fracon Products are prepared to fulfil the needs of your flocks by considering the operating conditions and the availability of the raw materials in the most economical way. In this direction; whatever percentage desired of concentrate, premixes, and feed additives can be producible according to your feedback. As Fracon, we believe that using one premix that is capable of meeting your nutritional needs instead of using the vitamins, minerals, amino acids, enzymes etc.. one by one could be more beneficial. For that reason, we set forth the "All in One" concept to the market.

The reason of Choosing Fracon

- Provides a single product with an ideal formulation and a highly homogeneous mixture.
- The products that have been not tested on the field are never presented to you
- Our laboratory is always at your service to preserve quality production.
- We are always on your side with formulation support, consultancy services, production at European standart

Profound Experience in Nutrition

- Faster transition into laying period
- More uniform flocks and eggs;
- Increase the egg yolk quality and the egg shell
- Longer peak periods;
- Decreased rate of mortality, broken, cracked, dirty eggs
- Increases immunity against diseases
- High performance
- Approximately 8-10 weeks gain in passing to thin shell period.
- Ensures feed hygiene with qualified preservatives
- Enriches the feed content and provides healthy and well-balanced diet as well as specially formulized for each breed and each step of production
- Standardize the feed and ensure the continuous efficiency
- Eliminates dependence on amino acids and includes all the necessary enzymes
- No need for additional feed additives
- Works coherently with your available raw materials in your region

Expérience approfondie en nutrition

- Transition plus rapide vers la période de ponte
- Des troupeaux et des œufs plus uniformes ;
- Augmenter la qualité du jaune d'œuf et de la coquille d'œuf
- Plus longue période de ponte
- Diminution du taux de mortalité, rupture, œufs fêlés et sales
- Augmente l'immunité contre les maladies
- Haute performance
- Environ 8 à 10 semaines de gain passage à la période des coquilles minces.
- Assure l'hygiène des aliments avec des conservateurs
- Enrichit le contenu du flux et fournit une alimentation saine et équilibrée ainsi que spécialement formulé pour chaque race et chaque étape de production
- Standardiser l'alimentation et assurer l'efficacité continue
- Élimine la dépendance aux acides aminés et comprend toutes les enzymes nécessaires
- Pas besoin d'additifs alimentaires supplémentaires
- Fonctionne en cohérence avec vos matières premières disponibles dans votre région
